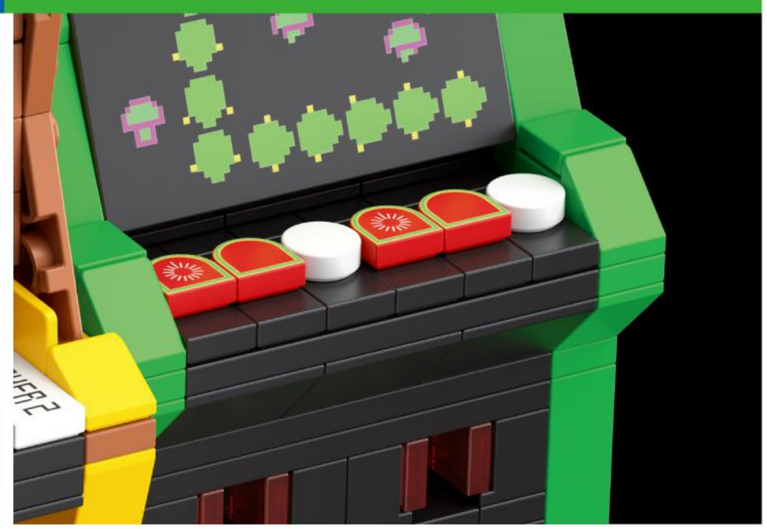
CENTIPEDE



PONG®

Pong bounced into arcades in 1972 and changed video game history forever. Created by Atari and designed by Allan Alcorn, this simple table tennis simulation had players volleying a glowing square "ball" back and forth across the screen. With just two paddles and a few beeps, Pong proved that video games could be competitive, addictive, and wildly fun.

What started as a test project quickly became a sensation, packing bars and arcades with curious players eager to try this new electronic entertainment. Its massive success launched Atari as a powerhouse in the gaming industry and helped spark the entire arcade video game boom. Simple, iconic, and endlessly replayable, Pong didn't just start a trend, it started an industry.

ASTEROIDS®

Asteroids blasted into arcades in 1979 and helped kick off the golden age of arcade gaming. Designed by Ed Logg, the game stood out with its sleek vector graphics, physics-based controls, and intense, addictive gameplay. Players rotated, thrust, and drifted through space, blowing up asteroids and dodging danger in every direction, even jumping to hyperspace when things got too wild.

It quickly became Atari's best-selling arcade game, topping the charts in 1980 and knocking Space Invaders from its throne. With over 70,000 units sold and massive earnings from coin drops, Asteroids became a cultural phenomenon. It influenced countless games, fueled the high-score craze by letting players enter their initials, and earned a place in the World Video Game Hall of Fame.

CENTIPEDE®

Centipede crawled into arcades in 1981 and quickly became one of Atari's biggest hits of the golden age. Designed by Ed Logg and Dona Bailey, the game dropped players into a mushroom-filled battlefield where they used a trackball controlled "bug blaster" to fend off a fast-moving centipede and other creepy crawlies. Its bright colors, frantic pace, and smooth controls made it an instant arcade favorite, and the second highest grossing game of 1982.

But Centipede wasn't just a hit, it stood out. It attracted a notably large female player base at a time when arcades were mostly male dominated. Even more groundbreaking, Dona Bailey was one of the first female video game programmers, helping pave the way for women in the industry. Decades later, the game's legacy was cemented with its induction into the World Video Game Hall of Fame in 2020.
